

Intern / Working Student Business Development (Founder-Assistant) – Tech-Startup „BioThrust“

BioThrust GmbH is a **Deep-Tech Startup** from RWTH Aachen University in Germany and develops innovative aeration systems for bioreactors. Our technology increases the yield of biotechnological processes by up to 250%. We are continuously looking for **Business Development Interns** to support our team in sales, strategy, financial and management activities. **Working Student** is also an option.

Why BioThrust:

- Opportunity to shape the business development of an innovative company directly from scratch
- Great responsibility with large impact directly working for the founder team (as their “right hand”)
- Diverse tasks such as new customer acquisition, contract preparations, support of fundraising activities and trade show visits
- Opportunity to be actively involved in central management decisions
- Great impact and development opportunity in a dynamic environment

Your Profile:

- Study program with some relation to business activities (incl. Business Administration, Industrial Engineering (WI-ING), Business Informatic (WI-NF))
- Strong analytical and problem-solving skills
- You work reliably, structured and proactively suggest ideas
- You find dynamic tasks with a high economic impact exciting
- You are highly motivated, committed and enthusiastic about new challenges
- You enjoy making new contacts and interactions with people
- You are fluent in German and English

Please send your application including relevant documents (CV, current transcript of records) to the address below!
